PORTFOLIO

Our Achievement in DRUPAL (PHP):-

We have developed themes, modules for developing this community portal. We have developed themes in this website. Themes are based on PHPTEMPLATE theme engine. We have hands on experience in developing any type of theme in Drupal using all theme engines like Xtemplate, smarty template, PHPTAL, PHPTEMPLATE theme engine.

In module development we have hands on expertise. We can develop any type of module for new website and can customize the existing one according to the specification of project. We are known to almost all API existed in drupal available from DRUPAL from 4.6 to 5.0 version.

We have proved ourselves in developing projects using drupal framework. We have got recently three new projects from our Israel based client in three new domain “Medical”, “media”, and “Gaming”.

Client Appreciation: - We got client appreciation for all sites developed by us.

Process of Work: - We follow completely SDLC process in making website. All projects passes through SDLC phases and steps. Feasibility Analysis, Requirement Analysis, Project Design, coding, Testing and Maintenance are the process that we passes before completing any project.

Expertise in JOOMLA: - We are expert in JOOMLA. We have ability to develop any new JOOMLA components, modules and templates. We are able to do any type of joomla project.

PORTFOLIO

Expert in SEO (Search engine optimization): -

Good exposure in Drupal website SEO module setting and setup.

PORTFOLIO

Expertise in Technology

- Experience in developing web and windows application.
- Good hands on windows services and web services.
- Some of our applications are www.kyazoonga.com
- Developed CRMs running over LAN

PORTFOLIO

What process do we follow for a new joomla development?

Process for a new joomla development:-For new joomla development we install joomla.
Installation and Development Process followed by us: -

We,

- Extract joomla zip or tar.
- Create database.
- Installs by following instruction and filling various forms.
- Remove installation folder from directory.
- In php.ini set REGISTER_GLOBAL variable to OFF (For Security Reason).
- Customize templates according to client needs.
- Remove already existing joomla modules and components that are not required for the project (To maintain execution time of script).
- Review already installed (modules and components For Security Reason).
- Integrate customized joomla templates.
- Downloads the modules and components which is necessary for client requirement
- Review codes of downloaded modules and components (For security purpose).
- Integrate those modules and components after reviewing with joomla
- In case some components or modules are not available then we make those modules or components.
- In case a component is available but having some functionality not all as per requirement then we tweak that component or module.
- We have our own made components and modules in joomla and mambo both

Joomla!™

PORTFOLIO

What process do we follow to develop or maintain a Joomla site?

For developing and maintaining Joomla sites we follow following steps:--

- We are registered with various Joomla forums, which give us proper information and updates on Joomla.
- Versions for components and modules keeps on coming in Joomla then in that case we replace new Joomla components with older one after proper review of codes.
- We have developed our own Joomla components, modules and templates that are operational in websites developed by us.
- We follow Joomla standards in developing components and modules.
- Components developed and tweaked by us can be seen on svas.org and harborresearch.com. Modified components are Extcalendar, com_halosys.

PORTFOLIO
